<b>SESSION 2</b>	<b>June 28-July 9</b>	<b>Monday-Friday (No Class on Tues)</b>
6:15 PM Series	Exploration Series, Journey Series & Challenge	

ALL SESSIONS FULL

## Class Descriptions

**The Exploration Series:** The Exploration Course is the first program designed for children ages 6 months to 3 years that includes water safety education as its core focus. The parent/caregiver is taught how to prevent and manage an aquatic emergency in addition to basic CPR skills. The Exploration water skills will give the parent a wide variety of activities to use to safely enjoy the water with their child while developing a strong base of aquatic skills.

**The Journey Series:** The Journey Series is an interactive program for children ages 4 to 7 years designed around "Themed" learning. There are seven Adventures within the Journey Book series, each with its own story and skill sheet. These aquatic adventures break down swimming skills into a simplified format. By providing an imaginative adventure to learning, the children are provided a fun way to develop new swimming skills. The story for each adventure gives the instructor a creative way to introduce and teach individual swimming components. Themed learning, combined with the use of specific teaching techniques is designed to break down barriers to learning and allow the children to progress quickly.

**The Challenge Skills:** The Challenge Program is a learner-based program designed for older children through adulthood that provides individuals with safety and swimming skills that will be used for lifelong enjoyment of the water.
